DETAILED ACTION

Allowable Subject Matter

Claims 1-22 are allowed.

The instant application is deemed to be directed to a non-obvious improvement over the invention patented in Pat. No. 5,956,251. The improvement comprises the steps of receiving a target assembly dimension of a part, a feature corresponding to the part, a feature tolerance including size/geometric tolerance of the part; accessing stack-up rules in response to the feature tolerance data comprising instructions to determine form/orientation/profile tolerance of the feature in order to calculate a nominal dimension and stack-up tolerance for the feature of the part; and performing the stack-up analysis in response to the nominal dimension and stack-up tolerance resulting in mean and a standard deviation for the part dimension while Atkinson et al. in Pat. No. 5,956,251 teaches a process of establishing valid statistical dimensional tolerance limits for parts from a set of predetermined dimensional tolerances.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
